

CYBEX
Serious about fitness.

PLATE LOADED & FREE WEIGHTS

CYBEXercise

SCIENCE that sculpts the HUMAN BODY

CYBEX's Plate Loaded and Free Weight equipment now offers lines and styling created to complement the entire range of CYBEX strength products. The new sleek design seamlessly integrates the products into your facility's environment and still provides the CYBEX brand identity your members value in strength equipment.

Packed with features and exceptional movements, the Plate Loaded line — like all CYBEX strength products — merges superior technology with a passion for fitness. Backed by exercise science, CYBEX equipment reflects our heritage in sports medicine and design engineering based on the proper mechanics of human movement. Given our decades of dominance in commercial strength equipment, there is probably no true fitness professional who has not used CYBEX strength products.

CYBEX's Plate Loaded and Free Weight lines are the definition of strength training — and equipment no club wants to be without.

Plate Loaded

LEG PRESS

- Open, walk-through design for easy roll through access for benches
- Fifteen-pound take-off weight allows users of all levels the ability to exercise
- The 90° path of motion for adaptability to all exercises
- 18 bar and catch hooks in four-inch increments

- Three position adjustable backrest
- Linear bearings allow a smooth, quiet motion and are fully enclosed for safety
- Optional 10" (25 CM) Weight Post Kit available for added resistance

SMITH PRESS

SQUAT PRESS

- Seat moves with input arm for maintenance of alignment
- Kneepads adjust for tibia length and range of motion

- Direct linkage system provides a variable resistance profile to ensure proper strength curve throughout the range of motion
- Four-bar linkage mechanism maintains the correct ankle position throughout the motion

SEATED CALF

Plate Loaded

CHEST PRESS

- The 25° converging pattern provides an exceptional range of motion with consistent torque at the joint
- Independent arm motion for balanced strength development
- Two-position selectable starting position for a broad range of user size and flexibility
- Overhead pivot provides a natural path of motion
- "Extra-sized" grips reduce pressure on the hands for greater comfort when pressing

- The 20° converging pattern provides an exceptional range of motion with consistent torque at the joint
- Independent arm motion for balanced strength development
- Barbell and neutral grips
- "Extra-sized" grips reduce pressure on the hands for greater comfort when pressing

OVERHEAD PRESS

ROW

- The 10° diverging pattern allows the arms to comfortably pass to the sides of the torso
- The descending pattern of motion and flexible trailing link handles provide a consistent torque at the joint for highly effective training
- Independent arm motion for balanced strength development
- Dual foot braces for added stabilization

- The 15° diverging pattern provides an exceptional range of motion with consistent torque at the joint
- Barbell and neutral grips provide multiple grip choices
- Independent arm motion for balanced strength development

PULLDOWN

Free Weights

- Frame is contoured for easy spotter access
- Two-position plated bar catches protect frame from contact with bar
- The adjustable six-position leg support provides stabilization and user fit

OLYMPIC BENCH PRESS

- Frame is contoured for easy spotter access
- Two-position plated bar catches protect frame from contact with bar

OLYMPIC BENCH STORAGE ATTACHMENT

- Four weight storage pegs per side.
- Bolt-on design for installation at any time.

OLYMPIC DECLINE PRESS

- Elbow pad is angled 55° to vary resistance and improve comfort
- Seat is angled 10° for comfort

OLYMPIC INCLINE PRESS

- Frame is contoured for easy spotter access
- Six seat-height positions allow for fine-tuning of user position
- Two-position plated bar catches protect frame from contact with bar

SCOTT CURL

Free Weights

45° BACK EXTENSION

- Unique pivoting thigh pad provides relief for the knee joint enhancing both comfort and safety
- The 45° angle provides close alignment of strength curve for the low back and hamstrings
- Adjustment range of 13.5" (34 cm) accommodates users of all sizes

- Back pad has eight positions from -10° to 80°
- Seat pad provides three positions from 0° to 20°
- Features include wheels and a handle for easy moving that doubles as a footrest

ADJUSTABLE -10° TO 80° BENCH

FLAT BENCH

- Three-point contact provides excellent stability
- Strong but lightweight design can be easily moved

- Back angle is 85° for improved comfort and stability without interfering with overhead movements
- Footrest provides for improved user stability

UTILITY BENCH

Free Weights

- Offset angle prevents wrist strain while removing and replacing dumbbells
- Individual dumbbell cradles improves rack safety profile
- Dumbbell saddles made of wear resistant high-density polyethylene plastic
- Full shelf prevents dumbbells from falling through
- Storage space for 10-pairs of any size dumbbell

TWIN-TIER DUMBBELL RACK

- Six plate storage pegs
- Polymer bumpers on storage pegs protect frame finish from plates

WEIGHT TREE

Features & Benefits

Adjustable Start Position

Select CYBEX Plate Loaded models allow adjustable start positions for perfect alignment and improved safety. A rare feature in Plate Loaded equipment.

Intuitive Adjustment Markers

Intuitive markers, placed within easy view, make adjustments fast and simple.

Instructional Placards

Because not everyone knows how to use every machine, CYBEX Plate Loaded line provides detailed instructional placards.

Molded Feet

Custom molded feet protect your flooring and help keep the machines where you want them.

Low Profile Designs

You want people to see your facility. We've paid particular attention to minimizing the visual clutter at eye level to help you provide an open, airy environment for your members.

manufacturing **EXCELLENCE**

CYBEX uses state-of-the-art manufacturing methods, the finest raw materials, and a skilled workforce to produce the world class fitness equipment that carries the CYBEX brand.

Modern Factory

Our Plate Loaded and Free Weight equipment is built in a brand new 340,000 square foot manufacturing facility in Owatonna, MN USA, that came on line in 2007.

The plant is vertically integrated and has the latest automation and

manufacturing technology available. This is a world class operation without rival among commercial fitness manufacturers.

Premium Raw Materials

Starting with the best raw materials is critical to producing the best quality finished product. CYBEX purchases steel direct from the mills to support our own specifications and chemistry. To produce a paint finish that endures, CYBEX and DuPont teamed up to develop proprietary powder paint formulations that repeatedly demonstrate the highest levels of performance in the commercial fitness club environment.

Experienced Work Force

CYBEX has been producing commercial strength products in middle America with our seasoned and dedicated work force for over 25 years. As an

example, welding is at the core of our manufacturing at CYBEX. Virtually every manufactured fitness product is made with welding and we use the latest technology, automation, and skilled technicians to ensure our welds are at the forefront of the industry. Our employees' pride and workmanship is evident in every piece of "furniture grade" exercise equipment that leaves our facility.

Build to Order

At CYBEX, we don't start to build until 10 working days before the customer wants their products shipped. No old equipment sitting around in inventory. And... build to order means that every product is built to the customer's color specifications in both frame and upholstery. CYBEX can accommodate special requests that often present themselves when customers are building or renovating their fitness facility... CYBEX is known for our short lead times.

Environmentally Responsible

CYBEX is a serious manufacturer. We don't just assemble – we cut, bend, weld and coat steel. In doing

our job, we recognize the value our customers place on premium quality, but also their environmental values. Like our customers, CYBEX is committed to protecting our environment and keeping "Mother Nature" fit.

countless options with UNPARALLELED PERFORMANCE

CYBEX – the brand leader in Plate Loaded and Free Weight equipment – now has an updated look. CYBEX has maintained the rugged durability we are known for and the new products are packed with unique features and uncomplicated movements. But now sleeker and more stylish, the new equipment complements the lines of other CYBEX strength and can be seamlessly integrated as one look in your facility.

No matter how many other types of strength training a fitness facility offers, plate loaded and free weights are still training tools no one wants to be without. And CYBEX is the very definition of strength training.
